1. COMMENTS ON OIR ECONOMIC DEFENSE STAFFING PROGRAM

Discussion -- The OSD member, referring to item 3 in IWG/M-66, stated that his Office felt that definitive action should not be taken by the Executive Committee of EDAC on "spot" contributions by OIR/State until the intelligence community had been afforded an opportunity to review such contributions. It was agreed that such review was not required for OIR contributions to MDAC in the normal course of business between those two agencies, but Mr. Tilson, MDAC, agreed that the intelligence community would have an opportunity to review those matters which reached the Executive Committee level. The Acting Chairman further advised the OSD member that written assurances would be obtained from the Chairman, Executive Committee, that all spot requests from the EDAC structure would be channeled to appropriate agencies in accordance with the responsibilities outlined in DCID 15/1.

2. ASSESSMENT AND/OR RECORD OF COMMODITY INTELLIGENCE

25X1A9a

Discussion - At the last IWG meeting the MDAC member agreed to provide the IWG with a statement of purpose and detailed specifications of what might be desirable in the way of a permanent record and/or an assessment of the commodity intelligence furnished JOC during the security list review. Mr. Tilson explained that it was now the opinion of MDAC that the utility to be derived from such a project would not be justified in terms of the manhours required. MDAC, therefore, was requesting that this proposed exercise not be initiated. Mr. [REDACTED] reported that the intelligence material provided JOC by CIA during the several list reviews has been assembled centrally in CIA and could serve as a reference file for the intelligence community. He suggested that the proposed assessment of the contributions made to JOC not be undertaken at this time.

The Acting Chairman requested comments on the merit of a periodic inventory of projects of an economic defense nature produced within the intelligence community. Project inventories currently being prepared by the EIC and OIR/State were cited, and reference was made to EDAC Memo No. 40a of 8 May 1954 which established in MDAC a central reference point for the correlation and coordination of all economic defense requests (except those transmitted through IWG) upon the intelligence community.

Action - The Executive Secretary was instructed to undertake, on a trial basis, the preparation of a monthly inventory of all projects completed or in process within the intelligence community which are considered directly relevant to the needs of the economic defense program. IWG members were requested to assist in this project by supplying the Executive Secretary with a copy of any such inventory produced by their respective agencies.

3. PREPARATION OF COORDINATED LISTS OF DECONTROLLED COMMODITIES

Discussion - The IWG Subgroup on "Intelligence on Trade in Decontrolled Commodities" had originally been assigned the task of preparing a list of decontrolled commodities the movement of which should be traced. IWG Case No. 76, a recapitulation of developments on this IWG project, was distributed. Mr. Tilson informed the members that Mr. Levin of the MDAC Staff had written a memorandum which now proposed that JOC assume responsibility for preparation of this list.

4. BRIEFING ON ECONOMIC DEFENSE ACTIVITIES IN CIA

Discussion - The Acting Chairman described the role of CIA in furnishing intelligence support to the economic defense program. He provided a graphic description of the organizational structure and activities of the several divisions in the Office of Research and Reports (ORR), emphasizing the functions of the Economic Defense Division (D/E/RR). He explained that the primary responsibility for commodity intelligence production now rests with the research area of ORR and that D/E/RR is responsible for the coordination of commodity research support and for intelligence support in the enforcement field. Appropriate transfers of personnel have been made in connection with this readjustment of responsibilities. Referring to the Administrative Action Program (AAP), the Acting Chairman reported that effective liaison had been established between the name intelligence files in Commerce and CIA. Mr. [REDACTED] spoke of the procedures in ORR by which commodity support is provided in response to requests from the EDAC-ACEP structure.

5. PROPOSAL FOR STUDY OF INDIUM

Discussion - Intelligence Request No. 1 of 20 October, outlining an FOA/MDAC request for an IWG intelligence study on Soviet bloc and Western European production and uses of indium, was distributed. MDAC has indicated that intelligence developed will be used by action agencies in determining whether this commodity should be made subject to U.S. and COCOM trade controls.

Action - It was agreed that IWG would undertake to provide the information requested by MDAC, and that the OIR and OSD members would coordinate the production of this study with Mr. [REDACTED] ORR.

The committee is composed of representatives from CIA, MDAC, Commerce, OSD, FOA and State (OIR and EDS).
